COUNTY OF IMPERIAL PUBLIC WORKS

Request for Proposal (RFP)

Design Engineering Services for:

Sidewalk Improvements on Heffernan Avenue from 11th Street to 14th Street
State Project number ATPSB1L-5958(117), County Project Number 6516

ADDENDUM NO. 1

October 16, 2020

This ADDENDUM is hereby made part of the RFP to the same extent as if originally included therein, and shall be signed by the Consultant and included with the proposal. This Addendum is posted on the on the Imperial County Public Works web page.

Question 1: What is the estimated budget for this project?

The County was awarded a total of \$642,000 of state-only funding through Active Transportation Program to complete Preliminary Engineering, Right of Way, and Construction.

Question 2: Given potential delivery delays and office closures due to the ongoing pandemic, will the County consider electronic submissions in lieu of hard copies?

No. Consultants must submit proposals according to the requirements stated within the Request for Proposal.

Question 3: Will geotechnical studies be required to determine the soil conditions, or will typical county standards for sidewalk width and base preparation be acceptable without geotech investigations?

A Geotechnical Assessment will be anticipated for this project.

Question 4: Will landscape and irrigation be required for areas behind sidewalk limits?

No.

Question 5: How many stakeholder collaboration meetings are anticipated are desired?

This is to be determine as the project progresses. This project requires approval from the Department of State Architect. The County understands that final design may impact different stakeholders (e.g. power pole removal/relocation, school parking lot reconfiguration, etc.). It is up to the Consultant to determine the best methodology to address stakeholder input within design engineering.

Question 6: On the corner of 11th Street and Heffernan Avenue, there are currently parking stalls on 11th Street and Heffernan Avenue outside the fenced surface parking lot. Are those staying in place or being removed?

Consultant will need to coordinate with Heber Elementary School on final design.

Question 7: What is the anticipated half width of Heffernan Avenue – Center line of roadway to back of walk?

Consultant will need to conduct surveys to identify the limit for the construction as part of the coordination with the County during the design.

Question 8: Please provide clarification regarding the contact lists that will be provided by the county for collaboration and outreach to neighboring residents, Heber Elementary School students, parents and other target stakeholders, or whether the consultant will be responsible for creating a contact list from scratch. We understand that we will update whatever list the County provides, but would like to understand how much contact information the County already has from prior engagement with this community?

The County does not have a contact list for collaboration/outreach, see response to Question 5. Consultant should be prepared to coordinate design efforts primarily with the Heber Elementary School District, Imperial Irrigation District, and any other utility companies.

John A. Gay, P.E.
Director of Public Works

Acknowledgement of Addendum No. 1

The consultant is responsible for advising any and all subcontractors/subconsultants of this change. Each consultant must acknowledge receipt of this addendum in the noted space below. **This Addendum must be attached to the proposal.**
